

Rendering life into design
with LUMION

11

Why rendering with Lumion is different

Lumion makes rendering an integral part of the architect's craft. It fits seamlessly into design workflows and it makes the rendering process simple and enjoyable, from the moment you import your model until you render out a beautiful image, video or 360 panorama.

You will enjoy yourself as you surround your residential home design with majestic mountains, show idyllic waterfront views with your interior design, and create captivating forests, energetic cities and sleepy suburbs.

Whatever you imagine for your design, Lumion architecture rendering software makes it easy to capture the aesthetic, the sensations and the emotions of your project.

Create a simpler rendering workflow

Model provided by Marco Caccini.

**1. Import a model
or set up real-time
rendering**

**2. Craft the
environment
around your
design**

**3. Render an
image, video or
360 panorama**

Render lazy Sunday mornings

Go beyond photorealism and ignite emotion in the viewer. Effects such as Real Skies, Precipitation and Styles help create the perfect atmosphere you'd like to convey.

With over 6,000 models for nature, interior, exteriors and rural or urban contexts, it takes just minutes to depict the real-life interaction between people, setting and design.

Over 1,250 materials make buildings, interiors and landscapes feel real.

Intuitive animation features make it easy to show the movement, energy and life in your design.

Make rendering a part of your craft

Forget what you know about rendering. Lumion is different.

Lumion turns rendering into a satisfying, even enjoyable part of your design workflows. LiveSync quickens design development through a real-time connection with the top CAD programs.

Orthographic views, animating phasing, photo matching, and other workflow-boosting tools significantly reduce the time it takes to create beautiful images and videos for your proposal.

Download satellite and height maps for instant context with OpenStreetMaps. Plant hundreds of trees in a sweep of the mouse with Paint Placement. Simplify every element of the rendering process.

Beautiful renders are within your reach

Lumion is compatible with all CAD software. Real-time rendering with LiveSync is available for Revit, SketchUp, ArchiCAD, Rhino, AutoCAD, Vectorworks and BricsCAD.

Lumion 11 reduces the time it takes to create renders full of life, beauty and your unique vision.

With exciting new features released every year, a continuously growing content library of models and materials, and a worldwide community of impassioned users, Lumion brings simplicity and joy to the art of rendering.
